# Projector Features

This multimedia projector is used to project various computer signals as well as NTSC/PAL/SECAM video signals onto a screen. Little space is required for installation and large images can easily be realized.

## ● **Ultra High Brightness**

Crisp, ultra-bright presentations is achieved by using a UHB (ultra high brightness) lamp and a highly efficient optical system.

## ● **Whisper Mode Equipped**

Special mode is available for reducing projector noise to achieve quieter operation.

## ● **User Memory Function**

This projector can memorize 4 settings by MY MEMORY function.

## ● **Partial Magnification Function**

Interesting parts of images can be magnified for closer viewing.

## ● **Keystone Distortion Correction**

Quick correction of distorted images electrically.

**NOTE** • Keep the original packing material for future reshipment. For moving the projector, be sure to use the original packing material. Use special caution for the lens part.

# Setting Up

## Arrangement

**⚠ WARNING** • Before installation, make sure that the projector is turned off and the power cord is disconnected.

- Do not set up and move the projector, while it is hot.
- Install the projector in a suitable environment according to instructions of the “User’s Manual – Safety Guide” and this manual.
- The power outlet should be close to the projector and easily accessible.

Refer to the illustrations and tables below to determine the screen size and projection distance. The values shown in the table are calculated for a full size screen. ( $\pm 10\%$ )

### Reference for the 4:3 aspect ratio

A [inch (m)]	B [inch (m)]		C [inch (cm)]
	min.	max.	
40(1.0)	46(1.2)	71(1.8)	24(61)
60(1.5)	71(1.8)	107(2.7)	36(91)
70(1.8)	83(2.1)	126(3.2)	42(107)
80(2.0)	95(2.4)	144(3.7)	48(122)
100(2.5)	120(3.0)	181(4.6)	60(152)
120(3.0)	144(3.7)	217(5.5)	72(183)
150(3.8)	181(4.6)	272(6.9)	90(229)
200(5.1)	243(6.2)	364(9.2)	120(305)
250(6.4)	304(7.7)	455(11.6)	150(381)
300(7.6)	366(9.3)	547(13.9)	180(457)
350(8.9)	427(10.9)	638(16.2)	210(533)
400(10.2)	489(12.4)	730(18.5)	240(610)
500(11.4)	612(15.5)	913(23.2)	300(762)

### Reference for the 16:9 aspect ratio

A [inch (m)]	B [inch (m)]		C [inch (cm)]	D [inch (cm)]
	min.	max.		
40(1.0)	50(1.3)	77(2.0)	20(50)	23(58)
60(1.5)	77(2.0)	117(3.0)	29(75)	34(87)
70(1.8)	91(2.3)	137(3.5)	34(87)	40(102)

## Setting Up (continued)

### Adjusting The Projector's Elevator

- WARNING** • Do not touch about the lens and ventilation openings during use or immediately after use to prevent a burn.
- CAUTION** • To prevent damaging the projector and injuring yourself, always hold the projector whenever using the elevator buttons to adjust the elevator feet.

You can use the elevator feet to make adjustments if the surface on which you need to set the projector is uneven or if you otherwise need to adjust the angle of projection. The adjustment range of the elevator feet is 0 to 9 degrees.

- 1** Press and hold in the elevator buttons.
- 2** Raise or lower the projector to the desired height and then release the elevator buttons. When you release the elevator buttons, the elevator feet will lock into position.
- 3** As necessary, you can also finely adjust the height of the projector by twisting the elevator feet by hand.

## Setting Up (continued)

### Connecting Your Devices

**⚠ WARNING** • Whenever attempting to connect other devices to the projector, read thoroughly the "User's Manual - Safety Guide", this manual and the manual of each device to be connected. Incorrect connecting could result in fire or electrical shock.

**⚠ CAUTION** • TURN OFF ALL DEVICES prior to connecting them to the projector. Attempting to connect a live device to the projector may generate extremely loud noises or other abnormalities that may result in malfunction and/or damage to the device and/or projector.

**ATTENTION** • Make sure that you connect devices to the correct port. Incorrect connection may result in malfunction and/or damage to the device and/or projector. Refer to the section "Technical" of this manual for the pin assignment of connectors and RS-232C communication data.

- Some cables have to be used with core set. Use the accessory cable or a designated-type cable for the connection. For cables that have a core only at one end, connect the core to the projector.
- Secure the screws on the connectors and tighten.
- Whenever attempting to connect a laptop computer to the projector, be sure to activate the laptop's RGB external image output (set the laptop to CRT display or to simultaneous LCD and CRT display). For details on how this is done, please refer to the instruction manual of the corresponding laptop computer.

**NOTE** • Some computers may have multiple display screen modes. Use of some of these modes may not be compatible with this projector.

- For some RGB input modes, the optional Mac adapter is necessary.
- When the image resolution is changed on a computer, depending on an input, automatic adjust function may take some time and may not be completed. In this case, you may not be able to see a check box to select "Yes/No" for the new resolution on Windows. Then the resolution will go back to the original. It might be recommended to use other CRT or TFT monitors to change the resolution.

#### **NOTE Plug-and-Play Capability**

- Plug-and-Play is a system incorporated in the computer, its operating system and peripheral equipment (i.e. display devices).
- This projector is compatible with VESA DDC 1/2B. Plug-and-Play can be achieved by connecting this projector to computers that are VESA DDC (display data channel) compatible.
- Please take advantage of this function by connecting the accessory RGB cable to the RGB port (DDC 1/2B compatible). Plug-and-Play may not work properly if any other type of connection is attempted.
- Please use the standard drivers in your computer as this projector is a Plug-and-Play monitor.

# Setting Up (continued)

Please refer to the following (for example) for connecting your devices. See the rear of the projector. You can see the ports.

## Connecting The Power Supply

**WARNING** • Use extra caution when connecting the power cord as incorrect or faulty connections may result in fire and/or electrical shock. Please adhere to the “User’s manual – Safety Guide” and the following.

- Only plug the power cord into outlets rated for use with the power cord’s specified voltage range.
- Only use the power cord that came with the projector. If it is damaged, contact your dealer to newly get correct one.
- Never modify the power cord. Never attempt to defeat the ground connection of the three-pronged plug.
- Make sure that you firmly connect the power cord to the projector and wall outlet.

**1**

Connect the connector of the power cord to the AC inlet of the projector.

**2**

Firmly plug the power cord’s plug into the outlet.

# Remote Control

## Putting Batteries

### **CAUTION** • About the battery

- Keep a battery away from children and pets.
- Use only the battery specified: two AA batteries.
- Do not mix new battery with used one.
- Make sure the plus and minus terminals are correctly aligned when loading the battery (as indicated in the remote control).
- Dispose of batteries in accord with environmental laws.

**1**

Remove the battery cover.  
Slide back and remove the battery cover in the direction of the arrow.

**2**

Insert the batteries.  
Align and insert the two AA batteries according to their plus minus terminals (as indicated in the remote control).

**3**

Close the battery cover.  
Replace the battery cover in the direction of the arrow and snap it back into place.

## Remote Control (continued)

### Operating The Remote Control

**CAUTION** • Do not disassemble the remote control.

- Do not place the remote control near the projector's lens, fan, or vents.
- Do not drop or otherwise expose the remote control to physical impact.
- Do not get the remote control wet or place it on wet objects on it. Doing so may result in malfunction.
- Remove the batteries from the remote control and store them in a safe place if you won't be using the remote control for an extended period.

#### NOTE

- Replace the batteries whenever the remote control starts to malfunction.
- When strong light, such as direct sunlight or light from an extremely close range (such as from an inverter fluorescent lamp), hits the projector's remote sensor, the remote control may cease to function. Adjust the direction of the projector to keep light from directly hitting the projector's remote sensor.

- The remote control works with the projector's remote sensor.
- **Front remote sensor** is 3 meters with a 40 degree range (20 degrees to the left and right of a remote sensor).

**Rear remote sensor** is 3 meters with a 40 degree range (20 degrees to the left and right of a remote sensor).

- Also a remote signal reflected in the screen etc. may be available. If it is difficult to send a remote signal to the sensor directly, please try.
- Since the remote control uses infrared light to send signals to the projector (Class1 LED), be sure to use the remote control in an area free from obstacles that could block the remote control's output signal to the projector.

## Power ON/OFF

**WARNING** • When the power is ON, a strong light is emitted. Do not look into the lens or vents of the projector.

**NOTE** • Turn the power on/off in right order. Please power on the projector before the connected devices. Power off the projector after the connected devices.

### Turning On The Power

- 1 Remove the lens cap.
- 2 Set the power switch to [ I ] (ON).  
The STANDBY/ON indicator will light to solid orange.
- 3 Press the STANDBY/ON button.  
The projector lamp will light up and the STANDBY/ON indicator will begin blinking green.  
When the power is completely on, the indicator will stop blinking and light green.
- 4 Select an input signal according to the section “Selecting An Input Signal” of the following page.

### Turning Off The Power

- 1 Press the STANDBY/ON button.  
The message “Power off?” will appear on the screen for approximately 5 seconds.
- 2 Press the STANDBY/ON button again while “Power off?” the message is visible.  
The projector lamp will go off, and the STANDBY/ON indicator will begin blanking orange. Then the STANDBY/ON indicator will stop blinking and light to solid orange when the lamp cooling is complete.
- 3 Switch the power switch to [ O ] (OFF).  
The STANDBY/ON indicator will go off.
- 4 Attached the lens cap.

# Operating

## Selecting An Input Signal

**1** Select an input signal.

### ■ Using the INPUT dial

Turn the INPUT dial of the projector. Turning the dial cycles through the input ports as shown below. Select the signal you wish to project.

### ■ Using SEARCH button

Press the SEARCH button of the projector or the remote control.

Pressing the button automatically cycles through input ports and displays the picture of retrieved signal.

**memo** If no signal is found or the projector is unstable to find an input signal at any of its ports, it will turn to the state it was in prior to the search.

### ■ Using RGB button

Press the RGB button of the remote control.

Pressing the button toggles between the RGB ports as shown below. Select the signal you wish to project.

### ■ Using VIDEO button

Press the VIDEO button of the remote control.

Pressing the button toggles between the VIDEO ports as shown below. Select the signal you wish to project.

FOCUS buttons

ZOOM buttons

**2** Use the ZOOM buttons to adjust the screen size.

**3** Use the FOCUS buttons to adjust the focus.

## Operating (continued)

### Selecting The Aspect Ratio

- 1 Press the Aspect button to toggle between the modes for aspect ratio.

#### ■ At a RGB signal

4:3 ↔ 16:9

#### ■ At a video signal / no signal

4:3 → 16:9 → SMALL  
↑

*memo* At a HDTV signal of 1125i(1080i) or 750p(720p), only 16:9 can be selected.

### Using The Automatic Adjustment Feature

*memo* The automatic adjustment operation requires approximately 10 seconds. Also, please note that it may not function correctly with some input.

- 1 Press the AUTO button.

#### ■ At a RGB signal

The Vertical position (V POSITION), the horizontal position (H POSITION), the clock phase (H PHASE) and horizontal size (H SIZE) will be automatically adjusted.

*memo* Make sure that the application window is set to its maximum size prior to attempting to use this feature. Dark pictures may still be incorrectly adjusted. Use a bright screen when adjusting.

#### ■ At a video signal

The signal type mode best suited for the respective input signal will be selected automatically.

*memo* This function is available only when the AUTO is selected to the item VIDEO of the INPUT menu. For a component video signal, the signal type is identified automatically independently of this function.

## Operating (continued)

### Adjusting The Picture Position

**memo** This function is available only for RGB signals.

- 1 Press the POSITION button.  
As illustrated on the right, a dialog will appear on the screen to aid you in adjusting the position.

- 2 Use the cursor buttons ▲/▼/◀/▶ to adjust the position.

**memo** When you want to initialize the position, press the RESET button during adjustment.

- 3 Press the POSITION button again to close the dialog and complete this operation.

**memo** Even if you don't do anything, the dialog will automatically disappear after a few seconds.

### Correcting The Keystone Distortion

- 1 Press the KEYSTONE button.  
As illustrated on the right, a dialog will appear on the screen to aid you in correcting the keystone distortion.

- 2 Use the cursor buttons ◀/▶ to select the direction of distortion to correct (◒ or ◓).

- 3 Use the cursor buttons ▲/▼ to correct the distortion.

- 4 Press the KEYSTONE button again to close the dialog and complete this operation.

**memo** Even if you don't do anything, the dialog will automatically disappear after a few seconds.

**memo** When this adjustment is excessive, certain degradation may appear on the picture. Also, please note that it may not function correctly with some input.

## Operating (continued)

### Adjusting The Volume

- 1 Press the VOLUME button.  
As illustrated on the right, a dialog will appear on the screen to aid you in adjusting the volume.
  - 2 Use the cursor buttons ▲/▼ to adjust the volume.
  - 3 Press the VOLUME button again to close the dialog and complete this operation.
- memo* Even if you don't do anything, the dialog will automatically disappear after a few seconds.

### Muting The Sound

- 1 Press the MUTE button.  
As illustrated on the right, a dialog will appear on the screen indicating that you have muted the sound.
  - 2 Press the MUTE or VOLUME button to restore the sound.
- memo* Even if you don't do anything, the dialog will automatically disappear after a few seconds.

### Temporarily Blanking The Screen

- 1 Press the BLANK button.  
The input signal screen will shut off, and a BLANK screen will appear.
- memo* You can set the BLANK screen using the menu. Please refer to the item "BLANK" of the table of the section "SCREEN Menu".
- 2 Press the BLANK button again to remove the blank screen, and return to the input signal screen.

## Operating (continued)

### Freezing The Screen

- 1 Press the FREEZE button.  
As illustrated on the right, a dialog will appear on the screen, and the screen will freeze at the current image.

FREEZE  
button

- 2 Press the FREEZE button again to restore the screen to normal.  
The icon "||" will change to the icon "▶". And after a couple of seconds, the dialog will be closed and the screen will be restored to normal.

**memo** The freezing feature will automatically finish if a remote control's button that changes some display state (ex. blanking the screen, displaying a dialog or a menu, adjusting the picture, changing the input signal) is pressed, or a button of projector is pressed.

**NOTE** • If the projector continues projecting the same image for a long time (i.e. you forget to exit FREEZE mode), the image might possibly remain as an afterimage. Do not leave the projector in FREEZE mode for too long.

### Using The Magnify Feature

- 1 Press the MAGNIFY  button.  
As illustrated on the right, a dialog will appear on the screen to aid you in magnifying the picture.

MAGNIFY  
buttons

POSITION  
button

Cursor  
buttons

- 2 Press the POSITION button, then use the cursor buttons ▲/▼/◀/▶ to select the area to zoom.
- 3 Press the POSITION button again to finalize the zoom area.
- 4 Use the cursor buttons ▲/▼ to adjust the zoom level.
- 5 Press the MAGNIFY  button again to close the dialog and complete this operation.

**memo** The magnify feature will automatically finish if the automatic adjustment is executed, or the aspect, the signal type mode of video or the signal input state is changed.

## Operating (continued)

### Displaying The Child Window

**memo** This feature called "PinP (Picture in Picture)" is available only when a RGB signal is selected to main screen.

- 1 Press the PinP button.  
The child window with a picture of a video signal will appear.

- 2 Press the PinP button again to change the size of the child window or close the window.

Small child window → Large child window  
↑ ↓  
No child window

**memo** You can select the video signal to display in the child window, and the position of the child window.  
Please refer to the items "P.INP. INPUT" and "P.INP. POSIT." of the table of the section "INPUT Menu".

### Selecting An Audio Input

**memo** This feature is available only when the child window is on the screen.

- 1 When the child window is on the screen, press the VOLUME button.  
As illustrated on the right, a dialog will appear on the screen.

- 2 Use the cursor buttons ◀/▶ to select an audio input.

RGB (Audio input for the main screen)

Video (Audio input for the child window)

**memo** You also can adjust the volume using the cursor buttons ◀/▶. Please refer to the section "Adjusting The Volume".

- 3 Press the VOLUME button again to close the dialog and complete this operation.

**memo** Even if you don't do anything, the dialog will automatically disappear after a few seconds.

# Multifunctional Settings

## Using The Menu Functions

This projector has the following menus: MAIN, PICTURE-1, PICTURE-2, INPUT, AUTO, SCREEN, OPTION and NETWORK. Each of these menus is operated using the same methods. The basic operations of these menus are as follows.

- 1 Press the MENU button.  
The menu will appear on the screen.

- 2 Use the cursor buttons ▲/▼ to select a menu, then press the ► (or the ENTER) button to progress.  
The display of the selected menu will appear.

- 3 Use the cursor buttons ▲/▼ to select an item, then press the ► (or the ENTER) button to progress.  
The operation display of the selected item will appear.

- 4 Use the cursor buttons ▲/▼ to operate the item.

**memo** When you want to reset the adjustment, press the RESET button during the operation. Note that the items whose functions are performed simultaneously with operating (ex. LANGUAGE, WHISPER, H PHASE etc.) are not reset.

**memo** When you want to return to the previous display, press the ◀ or ESC button.

- 5 Press the MENU button again to close the menu display and complete this operation.

**memo** Even if you don't do anything, the menu will automatically disappear after a few seconds.

### ex. Turning off the built-in speaker

## Multifunctional Settings (continued)

**PICTURE-1 Menu (continued)**

Item	Description
MY MEMORY	<p>Select a command to load or save using the ▲ / ▼ buttons, and then press the ► (or the ENTER) button to perform the function.:</p> <p>LOAD1 ⇔ LOAD2 ⇔ LOAD3 ⇔ LOAD4</p> <p>SAVE1 ⇔ SAVE2 ⇔ SAVE3 ⇔ SAVE4</p> <p>This projector has 4 numbered memories for adjustment data. Performing the SAVE1, SAVE2, SAVE3 or SAVE4 puts the current adjustment data on the memory whose number corresponds with the command's number. Performing the LOAD1, LOAD2, LOAD3 or LOAD4 loads the data on the memory whose number corresponds with the command's number, and adjusts the picture automatically depending on the data.</p>
RESET	<p>Select the EXECUTE using the ▲ button to reset the PICTURE-1 menu items. : EXECUTE ⇔ CANCEL</p> <p>The items of the PICTURE-1 menu are collectively returned to the initial setting. Note that the items "MY MEMORY" and "GAMMA" of the CUSTOM menu under the item "GAMMA" are not reset.</p>

## Multifunctional Settings (continued)

### PICTURE-2 Menu

With the PICTURE-2 menu, the items shown in the table below can be performed. Perform each operation in accordance with the instructions in the table below.

MENU	
MAIN	V POSITION 20
PICTURE-1	H POSITION 142
PICTURE-2	H PHASE 31
INPUT	H SIZE 1344
AUTO	OVER SCAN 95
SCREEN	RESET
OPTION	
[OK]: SELECT	

Item	Description
<b>V POSITION</b>	Adjust the vertical position using the ▲ / ▼ buttons. : Up ⇄ Down <b>memo</b> This item can be selected only at a RGB signal.
<b>H POSITION</b>	Adjust the horizontal position using the ▲ / ▼ buttons. : Left ⇄ Right <b>memo</b> This item can be selected only at a RGB signal.
<b>H PHASE</b>	Adjust the horizontal phase to eliminate flicker using the ▲ / ▼ buttons. : Right ⇄ Left <b>memo</b> This item can be selected only at a RGB signal or a component video signal other than a COMPONENT port input of 525i(480i)/625i(576i)/SCART RGB.
<b>H SIZE</b>	Adjust the horizontal size using the ▲ / ▼ buttons. : Large ⇄ Small <b>memo</b> This item can be selected only at a RGB signal. <b>memo</b> When this adjustment is excessive, the picture may not be displayed correctly. In such a case, please reset the adjustment pressing the RESET button during this operation.
<b>OVER SCAN</b>	Adjust the over-scan ratio using the ▲ / ▼ buttons. : Small ⇄ Large <b>memo</b> This item can be selected only at a video signal. <b>memo</b> When this adjustment is too large, certain degradation may appear at the frame area of the picture. In such a case, please adjust small. <b>memo</b> The number displayed on the menu during this adjustment is just for your reference, and might not be exact display ratio.
<b>RESET</b>	Select the EXECUTE using the ▲ button to reset the PICTURE-2 menu items. : EXECUTE ⇄ CANCEL The items of the PICTURE-2 menu are collectively returned to the initial setting. Note that the item "H PHASE" is not reset.

# Multifunctional Settings (continued)

## INPUT Menu

With the INPUT menu, the items shown in the table below can be performed. Perform each operation in accordance with the instructions in the table below.

MENU		
MAIN	COLOR SPACE	AUTO
PICTURE-1	COMPONENT	COMPONENT
PICTURE-2	VIDEO	AUTO
INPUT	3D-YCS	TURN OFF
AUTO	VIDEO NR	LOW
SCREEN	P.INP. INPUT	VIDEO
OPTION	P.INP. POSIT.	<input type="checkbox"/>
	POWERUP INPUT	RGB
[OK]: SELECT		

Item	Description
<b>COLOR SPACE</b>	<p>Select a color space mode using the ▲ / ▼ buttons. :</p> <p>AUTO ⇔ RGB ⇔ SMPTE240 ⇔ REC709 ⇔ REC601</p> <p>Selecting the AUTO automatically selects the optimum mode.</p> <p><b>memo</b> This item can be selected only at a RGB signal or a component video signal other than a COMPONENT port input of 525i(480i)/625i(576i)/SCART RGB.</p> <p><b>memo</b> The AUTO operation may not work well at some signals. In such a case, select a suitable mode except the AUTO.</p>
<b>COMPONENT</b>	<p>Select a function of COMPONENT port using the ▲ / ▼ buttons. :</p> <p>COMPONENT ⇔ SCART RGB</p> <p>When the SCART RGB is selected, the COMPONENT port function as a port for a SCART RGB signal input. Please refer to the section "Connecting Your Devices".</p>
<b>VIDEO</b>	<p>Select a signal type mode using the ▲ / ▼ buttons. :</p> <p>AUTO ⇔ NTSC ⇔ PAL ⇔ SECAM ⇔ NTSC4.43 ⇔ M-PAL ⇔ N-PAL</p> <p>Selecting the AUTO automatically selects the optimum mode.</p> <p><b>memo</b> This item is performs only at a video signal from the VIDEO port or the S-VIDEO port. For a component video signal, the signal type is identified automatically independently of this function.</p> <p><b>memo</b> The AUTO operation may not work well at some signals. If the picture becomes unstable (ex. a irregular picture, a color lack), please select the mode depending on the input signal.</p>
<b>3D-YCS</b>	<p>Select the TURN ON or the TURN OFF using the ▲ / ▼ buttons. :</p> <p>TURN ON ⇔ TURN OFF</p> <p>When the TURN ON is selected, the 3D-YCS mode works for a completely still image, or images with few motions.</p> <p><b>memo</b> This item performs only at a video signal of NTSC3.58.</p> <p><b>memo</b> When this function performs, the setting of the item "VIDEO NR" of this INPUT menu is not effective.</p>
<b>VIDEO NR</b>	<p>Select a noise reduction level using the ▲ / ▼ buttons. :</p> <p>HIGH ⇔ MIDDLE ⇔ LOW</p> <p>The noise on screen is reduced according to the selected level.</p> <p><b>memo</b> This item performs only at a video signal from the VIDEO port or the S-VIDEO port. At a video signal of NTSC3.58, this function performs only when the TURN OFF is selected to the item "3D-YSC" of this INPUT menu.</p> <p><b>memo</b> When this adjustment is excessive, certain degradation may appear on the picture.</p>

(This table is continued to the following page.)

# Lamp

## WARNING

HIGH VOLTAGE

HIGH TEMPERATURE

HIGH PRESSURE

The projector uses a high-pressure mercury glass lamp. The lamp can **break with a loud bang, or burn out**, if jolted or scratched, handled while hot, or worn over time. Note that each lamp has a different lifetime, and some may burst or burn out soon after you start using them. In addition, when the bulb bursts, it is possible for **shards of glass** to fly into the lamp housing, and for **gas containing mercury** to escape from the projector's vent holes.

**About disposal of a lamp** • This product contains a mercury lamp; do not put in trash. Dispose of in accord with environmental laws.

For lamp recycling, go to [www.lamprecycle.org](http://www.lamprecycle.org). (in the US)

For product disposal, contact your local government agency or [www.eiae.org](http://www.eiae.org) (in the US) or [www.epsc.ca](http://www.epsc.ca) (in Canada).

For more information, call your dealer.

Disconnect the  
plug from the  
power outlet

- If the lamp should break (it will make a loud bang when it does), unplug the power cord from the outlet, and make sure to request a replacement lamp from your local dealer. Note that shards of glass could damage the projector's internals, or cause injury during handling, so please do not try to clean the projector or replace the lamp yourself.
- If the lamp should break (it will make a loud bang when it does), ventilate the room well, and make sure not to breathe the gas that comes out of the projector vents, or get it in your eyes or mouth.
- Before replacing the lamp, make sure the power switch is off and the power cable is not plugged in, then wait at least 45 minutes for the lamp to cool sufficiently. Handling the lamp while hot can cause burns, as well as damaging the lamp.

- Do not open the lamp cover while the projector is suspended from above. This is dangerous, since if the lamp's bulb has broken, the shards will fall out when the cover is opened. In addition, working in high places is dangerous, so ask your local dealer to have the lamp replaced even if the bulb is not broken.
- Do not use the projector with the lamp cover removed. At the lamp replacing, make sure that the screws are screwed in firmly. Loose screws could result in damage or injury.

- Use only the lamp of the specified type **DT00601**.
- If the lamp breaks soon after the first time it is used, it is possible that there are electrical problems elsewhere besides the lamp. If this happens, contact your local dealer or a service representative.
- Handle with care: jolting or scratching could cause the lamp bulb to burst during use.
- If the indicators or a message prompts you to replace the lamp (see the section "Related Messages" and "Regarding the indicator Lamps"), replace the lamp as soon as possible. Using the lamp for long periods of time, or past the replacement date, could cause it to burst. Do not use old (used) lamps; this is a cause of breakage.

## Lamp (continued)

### Replacing The Lamp

If the indicators or a message prompts you to replace the lamp, replace the lamp as soon as possible.

- 1** Turn off the projector, and unplug the power cord. Allow the lamp bulb to cool for at least 45 minutes.
- 2** Contact your dealer to prepare a new lamp. Tell the dealer your lamp type number. If the projector is mounted on the ceiling, or if the lamp has broken, also ask the dealer to replace the lamp.

#### In the case of replacement by yourself,

- 3** After making sure that the projector has cooled adequately, slide the knob of a lamp cover lock as shown in the Figure. Then, one side of the lamp cover is raised. Pull up the lamp cover and remove it, as shown in the Figure.

- 4** Unscrew the 3 screws, and slowly pull out the lamp by the handle. Be careful not to touch the inside of the lamp case.

- 5** Insert the new lamp, and tighten the 3 screws firmly to lock it in place.

- 6** Interlocking the 2 tabs of the lamp cover to the projector, put the lamp cover on the projector. Then push the point of the lamp cover to fix it, as shown in the Figure. Make sure that the lamp cover doesn't come up.

- 7** Turn on the projector, and reset the lamp timer.
  - (1) While the projector running, press the MENU button to open the menu.
  - (2) Choose the "OPTION" on the menu using the ▲ / ▼ button, then press the ► button or ENTER button.
  - (3) Choose the "LAMP TIME" using the ▲ / ▼ button, then press and hold the RESET button for 3 seconds.
  - (4) Choose the "RESET" using the ▲ button.

**memo** When the lamp has been replaced after the message of "THE POWER WILL TURN OFF AFTER 0hr." is displayed, complete this operation within 10 minutes of switching power on.

**memo** Incorrectly resetting of the lamp timer (resetting without replacement, or neglect of resetting after replacement) will result in incorrect message functions.

# Air Filter

**WARNING** • Please carefully read the “User’s Manual - Safety Guide.

- Before caring, make sure the power switch is off and the power cable is not plugged in, then wait at least 45 minutes for the lamp to cool sufficiently.
- Use only the air filter of the specified type **NJ08081**.
- Do not use the projector with the air filter and filter cover removed. The use without the air filter could result in damage.

**CAUTION** • If the air filter becomes clogged by dust or the like, internal temperature rises and could cause malfunction. The power is automatically turned off in order to prevent the projector from overheating internally.

## Caring For The Air Filter

The air filter should be cleaned about every 100 hours. If the indicators or a message prompts you to clean the air filter, clean the air filter as soon as possible.

If the soiling will not come off the air filter, or it becomes damaged, then it needs to be replaced. Please replace the air filter as soon as possible.

**memo** When you replace the lamp, please replace also the air filter.

**1**

Turn off the projector, and unplug the power cord. Allow the lamp bulb to cool for at least 45 minutes.

**2**

After making sure that the projector has cooled adequately, remove the filter cover and air filter.

**3**

Apply a vacuum cleaner to the top of the filter cover and the air filter to clean.

If the soiling will not come off the air filter, or it becomes damaged, it needs to be replaced.

If the air filter needs to be replaced, contact your dealer to prepare a new air filter. Tell the dealer your air filter type.

Hold the release buttons of the filter cover while pulling down it.

**4**

Insert the cleaned air filter or a new air filter, and replace the filter cover.

**5**

Turn on the projector power, and reset the filter timer.

- (1) While the projector running, press the MENU button to open the menu.
- (2) Choose the “OPTION” on the menu using the ▲ / ▼ button, then press the ► button or ENTER button.
- (3) Choose the “FILTER TIME” using the ▲ / ▼ button, then press and hold the RESET button for 3 seconds.
- (4) Choose the “RESET” using the ▲ button.

**memo** Incorrectly resetting of the filter timer (resetting without replacement, or neglect of resetting after replacement) will result in incorrect message functions.

Hold the release button of the air filter while pulling out it.

## Other Care

**WARNING** • Please carefully read the “User’s Manual - Safety Guide”.

- Before caring, make sure the power switch is off and the power cable is not plugged in.

- Be cautious of high temperature. Do not touch about the lens and ventilation openings during use or immediately after use prevent a burn.

- Never try to care for the inside of the unit yourself. Doing so is dangerous.

**CAUTION** • Incorrect care could have adverse influence such as discoloration, peeling paint, etc.

- Do not use cleaner or chemicals other than those listed below, including benzene and paint thinner.

- Do not use aerosols or sprays.

- Do not polish or wipe with hard objects.

### ***Caring For The Inside Of The Projector***

In order to ensure the safe use of your projector, please have it cleaned and inspected by your local dealer about once every year.

### ***Caring For The Lens***

**1** Turn off the projector, and unplug the power cord.

**2** Lightly wipe the lens with a commercially available lens-cleaning wipe. Do not touch the lens directly with your hand.

### ***Caring For The Cabinet And Remote Control***

**1** Turn off the projector, and unplug the power cord.

**2** Wipe lightly with gauze or a soft cloth.

**memo** If soiling is severe, dip soft cloth in water or a neutral cleaner dilute in water, and wipe lightly after wringing well. Then, wipe lightly with a soft, dry cloth.

# Troubleshooting

## Related Messages

When the unit's power is on, messages such as those shown below may be displayed. When any such message is displayed on the screen, please respond as described below. If the same message is displayed after the treatment, or if a message other than the following appears, please contact your dealer or service company.

**memo** Although these messages will be automatically disappeared around several minutes, it will be reappeared every time the power is turned on.

Message	Description
 <b>CHANGE THE LAMP</b>  <b>AFTER REPLACING LAMP, RESET THE LAMP TIMER.</b>	<b>The time the lamp timer has counted is approaching 2000 hours.</b> Preparation of a new lamp, and an early lamp change is recommended. After you have change the lamp, please be sure to reset the lamp timer.
 <b>CHANGE THE LAMP</b>  <b>AFTER REPLACING LAMP, RESET THE LAMP TIMER.</b>  <b>THE POWER WILL TURN OFF AFTER ** hr.</b>	<b>The time the lamp timer has counted is approaching 2000 hours, so a lamp change within ** hours is recommended.</b> When lamp usage reaches 2000 hours, the power will automatically be turned off. Please change the lamp by referring to the section "Lamp". After you have changed the lamp, please be sure to reset the lamp timer.
 <b>CHANGE THE LAMP</b>  <b>AFTER REPLACING LAMP, RESET THE LAMP TIMER.</b>  <b>THE POWER WILL TURN OFF AFTER 0 hr.</b>	<b>As the time the lamp timer has counted has reached 2000 hours, the power will soon be automatically turned off.</b> Please immediately turn the power off, and change the lamp by referring to the section "Lamp". After changing the lamp, please be sure to reset the lamp timer.

(This table is continued to the following page.)

**NOTE** • A lamp has a finite product life. Lamps are characterized by the fact that, after long hours of usage, a lamp will no longer light up, or the lamp will break or burst, etc. This projector is equipped with an automatic shut-down function, such that the power will automatically be turned off when lamp usage time has reached 2000 hours. Please be aware, however, that among lamp types, there are major differences in product lifetimes; a lamp may thus fail to light even prior to the functioning of the automatic shut-down function of this projector.

### Regarding The Indicator Lamps

Lighting and flashing of the STANDBY/ON indicator, the LAMP indicator, and the TEMP indicator have the meanings as described in the table below. Please respond in accordance with the instructions within the table. If the same indication is displayed after the treatment, or if an indication other than the following is displayed, please contact your dealer or service company.

**NOTE** • When the interior portion has become overheated, for safety purposes, the power source is automatically turned off, and the indicator lamps may also be turned off. In such a case, press the “○” (OFF) side of the main power switch, and wait at least 45 minutes. After the projector has sufficiently cooled down, please make confirmation of the attachment state of the lamp and lamp cover, and then turn the power on again.

Lighting in <b>Red</b>	<i>Blinking in Red</i>	Turned off	<p><b>Either there is no lamp and/or lamp cover, or either of these has not been properly fixed.</b></p> <p>Please turn the power off, and allow the unit to cool down at least 45 minutes. After the projector has sufficiently cooled down, please make confirmation of the attachment state of the lamp and lamp cover, and then turn the power on again. If the same indication is displayed after the treatment, please contact your dealer or service company.</p>
Lighting in <b>Red</b>	Turned off	<i>Blinking in Red</i>	<p><b>The cooling fan is not operating.</b></p> <p>Please turn the power off, and allow the unit to cool down at least 20 minutes. After the projector has sufficiently cooled down, please make confirmation that no foreign matter has become caught in the fan, etc., and then turn the power on again. If the same indication is displayed after the treatment, please contact your dealer or service company.</p>
Lighting in <b>Red</b>	Turned off	Lighting in <b>Red</b>	<p><b>There is a possibility that the interior portion has become heated.</b></p> <p>Please turn the power off, and allow the unit to cool down at least 20 minutes. After the projector has sufficiently cooled down, please make confirmation of the following items, and then turn the power on again.</p> <ul style="list-style-type: none"> <li>• Is there blockage of the air passage aperture?</li> <li>• Is the air filter dirty?</li> <li>• Does the peripheral temperature exceed 35°C?</li> </ul> <p>If the same indication is displayed after the treatment, please change the lamp by referring to the section "Lamp".</p>
Lighting in <b>Green</b>	Alternative <i>Blinking in Red</i>		<p><b>There is a possibility that the interior portion has become overcooled.</b></p> <p>Please use the unit within the usage temperature parameters (0°C to 35°C). After the treatment, resent the power to ON.</p>
Lighting in <b>Green</b>	Simultaneous <i>Blinking in Red</i>		<p><b>It is time to clean the air filter, or there is no air filter.</b></p> <p>Please immediately turn the power OFF, and clean or change the air filter by referring to the section "Air Filter". After cleaning or changed the air filter, please be sure to reset the filter timer. After the treatment, resent the power to ON.</p>

## Troubleshooting (continued)

### Phenomena That May Easily Be Mistaken For Machine Defects

**⚠ WARNING** • Never use the projector if abnormal operations such as smoke, strange odor, excessive sound, damaged casing or elements or cables, penetration of liquids or foreign matter, etc. should occur. In such cases, immediately turn off the power switch and then disconnect the power plug from the power outlet. After making sure that the smoke or odor has stopped, contact your dealer or service company.

Before requesting repair, please check in accordance with the following chart. If the situation cannot be corrected, please contact your dealer or service company.

**NOTE** • Although bright spots or dark spots may appear on the screen, this is a unique characteristic of liquid crystal displays, and such do not constitute or imply a machine defect.

Phenomenon	Cases not involving a machine defect	Reference pages
Power does not come on.	<b>The electrical power cord is not plugged in.</b> Correctly connect the power cord.	11
	<b>The power switch is not set to the on position.</b> Set the power switch to [ I ] (On).	14
	<b>The main power source has been interrupted during operation such as by a power outage (blackout), etc.</b> Please turn the power off, and allow the unit to cool down at least 20 minutes. After the projector has sufficiently cooled down, please turn the power on again.	14
	<b>Either there is no lamp and/or lamp cover, or either of these has not been properly fixed.</b> Please turn the power off, and allow the unit to cool down at least 45 minutes. After the projector has sufficiently cooled down, please make confirmation of the attachment state of the lamp and lamp cover, and then turn the power on again.	34, 35
Neither sounds nor pictures are outputted.	<b>The signal cables are not correctly connected.</b> Correctly connect the connection cables.	8~11
	<b>Signal source does not correctly work.</b> Correctly set up the signal source device by referring to the manual of the source device.	-
	<b>The input changeover settings are mismatched.</b> Select the input signal, and correct the settings.	15

(This table is continued to the following page.)

## Troubleshooting (continued)

### Phenomena That May Easily Be Mistaken For Machine Defects (continued)

Phenomenon	Cases not involving a machine defect	Reference pages
Pictures are displayed, but no sounds are heard.	<b>The signal cables are not correctly connected.</b> Correctly connect the connection cables.	8~11
	<b>The volume is adjusted to an extremely low level.</b> Adjust the VOLUME to a higher level.	18, 32
	<b>The sound is muted.</b> Press the MUTE button to restore the sound.	18
	<b>The audio input is not correctly selected when the child window is displayed.</b> Correctly select the audio input.	20
Sounds are heard, but no pictures are displayed.	<b>The lens cap is attached.</b> Remove the lens cap.	4, 14
	<b>The signal cables are not correctly connected.</b> Correctly connect the connection cables.	8~11
	<b>The brightness is adjusted to an extremely low level.</b> Adjust the BRIGHT to a higher level using the menu function.	22
	<b>The screen is blanked.</b> Press the BLANK button to return to the input signal screen.	18
Colors have a faded- out appearance, or Color tone is poor.	<b>Color settings are not correctly adjusted.</b> Perform picture adjustments by changing the COLOR BAL R, COLOR BAL G, COLOR BAL B, COLOR and/or TINT settings, using the menu functions.	23
Pictures appear dark.	<b>The brightness and/or contrast are adjusted to an extremely low level.</b> Adjust the BRIGHT and/or CONTRAST settings to a higher level using the menu function.	22
	<b>The WHISPER function is working.</b> Select the NORMAL to the item WHISPER in the MAIN menu.	22
	<b>The lamp is approaching the end of its product lifetime.</b> Replace the lamp.	34, 35, 38
Pictures appear blurry.	<b>Either the focus and/or horizontal phase settings are not properly.</b> Adjust the focus using the focus buttons, and/or H PHASE using the menu function.	15, 25
	<b>The lens is dirty or misty.</b> Clean the lens by referring to the section "Caring For The Lens".	37
Input signal changes with no operation.	<b>The INPUT dial is set between the click points.</b> Turn the INPUT dial and set it at a click point.	15

## Warranty And After-Service

If a problem occurs with the equipment, first refer to the “Troubleshooting” and run through the suggested checks. If this does not resolve the problem, please contact your dealer or service company. They will tell you what warranty condition is applied.

## Specifications

**NOTE** • This specifications are subject to change without notice.

Item		Specification
Product name		Liquid crystal projector
Liquid crystal panel	Panel size	2.5 cm (0.99 type)
	Drive system	TFT active matrix
	Pixels	786,432 pixels (1024 horizontal x 768 vertical)
Lens		Zoom lens F=1.7 ~ 2.4 f=30.5 ~ 45.8 mm
Lamp		310W UHB
Speaker		1.0W + 1.0W (Stereo)
Power supply		AC100 ~ 120V, 5.2A AC220 ~ 240V, 2.2A
Power consumption		470W
Temperature range		0 ~ 35°C (Operating)
Size		420 (W) x 150 (H) x 318 (D) mm (Not including protruding parts) • Please refer to the figure of the section “TECHNICAL” of the end of this manual.
Weight (mass)		6.9 kg
Ports		<div> <b>RGB input ports</b>            RGB            BNC (R, G, B, H, V)         </div> <div> <b>Video input ports</b>            VIDEO IN            S-VIDEO            COMPONENT            (Cr/Pr, Cb/Pb, Y)         </div> <div> <b>Audio input ports</b>            AUDIO IN 1            AUDIO IN 2            AUDIO IN R/L         </div> <div> <b>RGB output port</b>            RGB OUT         </div> <div> <b>Audio output port</b>            AUDIO OUT         </div> <div> <b>Control port</b>            CONTROL         </div> <div> <b>Other ports</b>            REMOTE CONTROL         </div>

1280 × 1024	91.1	85.0	VESA	SXGA (85Hz)	Zoom out
1600 × 1200	75.0	60.0	VESA	UXGA (60Hz)	Zoom out

- NOTE** • Be sure to check jack type, signal level, timing and resolution before connecting this projector to a computer.
- Some computers may have multiple display screen modes. Use of some of these modes will not be possible with this projector.
  - Depending on the input signal, full-size display may not be possible in some cases. Refer to the number of display pixels above.
  - Although the projector can display signals with resolution up to UXGA (1600 x 1200), the signal will be converted to the projector's panel resolution before being displayed. The best display performance will be achieved if the resolutions of the input signal and projector panel are identical.
  - Automatically adjustment may not function correctly with some input signals.
  - The image may not be displayed correctly when the input sync. signal is a composite sync. or a sync. on G.

# Initial Set Signals

The following signals are used for the initial settings. The signal timing of some computer models may be different. In such case, adjust the items V POSITION and H POSITION in the PICTURE-2 menu.

**memo** About the details of RS-232C communication, please refer to the following page.

# RS-232C Communication

## Connecting The Cable

- 1 Turn off the projector and the computer power supplies.
- 2 Connect the CONTROL port of the projector with a RS-232C port of the computer by a RS-232C cable. Use the cable that fulfills the specification shown in the previous page.
- 3 Turn on the computer power supply and after the computer has started up, turn on the projector power supply.

## Communications Setting

19200bps, 8N1

### 1. Protocol

Consist of header (7 bytes) + command data (6 bytes).

### 2. Header

BE + EF + 03 + 06 + 00 + CRC\_low + CRC\_high

CRC\_low : Lower byte of CRC flag for command data

CRC\_high : Upper byte of CRC flag for command data

### 3. Command data

Command Data Chart

byte_0	byte_1	byte_2	byte_3	byte_4	byte_5
Action		Type		Setting code	
low	high	low	high	low	high

Action (byte\_0 - 1)

Action	Classification	Content
1	SET	Change setting to desired value.
2	GET	Read projector internal setup value.
4	INCREMENT	Increment setup value by 1.
5	DECREMENT	Decrement setup value by 1.
6	EXECUTE	Run a command.

## RS-232C Communication (continued)

### Requesting projector status (Get command)

- (1) Send the request code Header + Command data ('02H'+ '00H'+ type (2 bytes)+ '00H'+ '00H') from the computer to the projector.
- (2) The projector returns the response code '1DH'+ data (2 bytes) to the computer.

### Changing the projector settings (Set command)

- (1) Send the setting code Header + Command data ('01H'+ '00H'+ type (2 bytes) + setting code (2 bytes)) from the computer to the projector.
- (2) The projector changes the setting based on the above setting code.
- (3) The projector returns the response code '06H' to the computer.

### Using the projector default settings (Reset Command)

- (1) The computer sends the default setting code Header + Command data ('06H'+ '00H'+ type (2 bytes) + '00H'+ '00H') to the projector.
- (2) The projector changes the specified setting to the default value.
- (3) The projector returns the response code '06H' to the computer.

### Increasing the projector setting value (Increment command)

- (1) The computer sends the increment code Header + Command data ('04H'+ '00H'+ type (2 bytes) + '00H'+ '00H') to the projector.
- (2) The projector increases the setting value on the above setting code.
- (3) The projector returns the response code '06H' to the computer.

### Decreasing the projector setting value (Decrement command)

- (1) The computer sends the decrement code Header + Command data ('05H'+ '00H'+ type (2 bytes) + '00H'+ '00H') to the projector.
- (2) The projector decreases the setting value on the above setting code.
- (3) The projector returns the response code '06H' to the computer.

### When the projector cannot understand the received command

When the projector cannot understand the received command, the error code '15H' is sent back to the computer.

Sometimes the projector cannot properly receive the command. In such a case, the command is not executed and the error code '15H' is sent back to the computer. If this error code is returned, send the same command again.

### When the projector cannot execute the received command.

When the projector cannot execute the received command, the error code '1cH' + 'xxxxH' is sent back to the computer. When the data length is greater than indicated by the data length code, the projector ignore the excess data code.

Conversely when the data length is shorter than indicated by the data length code, an error code will be returned to the computer.

- NOTE** • Operation cannot be guaranteed when the projector receives an undefined command or data.
- Provide an interval of at least 40ms between the response code and any other code.
  - The projector outputs test data when the power supply is switched ON, and when the lamp is lit. Ignore this data.
  - Commands are not accepted during warm-up.
